Dear Colleagues!

Organizing Committee invites you to take part in the Jubilee 10th International Conference «Electronic processes in organic and inorganic materials» (ICEPOM-10)

The objective of the conference is to discuss physical phenomena and processes in organic and inorganic materials and at their interfaces to other materials, as well as prospects of their practical applications.

SCIENTIFIC PROGRAM:

1. Electronic processes at interfaces of organic materials with metals, as well as biological, organic, and inorganic media;
2. Electro-optic processes in liquid-crystal-based heterogeneous systems;
3. Thin film structures and their application;
4. Electronic processes in nanostructures and polymer composites;
5. Nonlinear properties of polymer composites, nanostructures, NLO information recording;
6. Novel materials, structures, and technologies;
7. Physics and technology of organic solar cells, LEDs, FETs, sensors. Conjugated thin films for electrochromic devices;
8. Bio- and radio-technical systems and problems of energy conservation.

Lectures (30-45 minutes), oral reports (15-20 minutes), and posters will be presented at the conference.
