## Доступ до EndNote

The screenshot displays the Web of Science interface. At the top, a navigation bar includes links for 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', and 'Publons'. The 'EndNote' link is highlighted with a green box. Below the navigation bar, the 'Web of Science' logo is on the left, and the 'Clarivate Analytics' logo is on the right. A 'Search' section contains a 'Select a database' dropdown menu set to 'Web of Science Core Collection'. Below this, there are search tabs: 'Basic Search', 'Cited Reference Search', and 'Advanced Search'. The 'Basic Search' tab is active, showing a search input field with 'stock market' and a 'Topic' dropdown menu. A 'My Tools' dropdown menu is open, showing options: 'Saved Searches & Alerts', 'EndNote' (highlighted with a green box), 'ResearcherID', and 'Usage Reports'. At the bottom left, there is a 'TIMESPAN' section with radio buttons for 'All years' and 'From 1900 to 2018'. A 'MORE SETTINGS' link is also visible.

### Equalization of Lithium-Ion Battery Pack Based on Fuzzy Logic Control

**Abstract**

A nondissipative equalization scheme based on fuzzy logic control (FLC) is presented to improve the inconsistency of series-connected Lithium-ion batteries. The two-stage bidirectional equalization circuit with energy transferring inductors is designed to implement the equalization of cell to cell for battery packs, and the equalization circuit paves the way for module-based equalization of hardware. Equalization based on the state of charge (SOC) is proposed in this paper, and the Thevenin equivalent circuit model of the Lithium-ion battery, as well as the extended Kalman filter (EKF) algorithm, is employed for SOC estimation. For effective equalization, the FLC is proposed to reduce energy consumption and equalization time. The FLC strategy is constructed with a set of membership functions to describe the equalization behavior of the cell. A comparison of the proposed FLC with the mean-difference algorithm is carried out to validate the advantages of the proposed scheme. Simulation results show that the standard deviation of final SOC reduces by 18.5%, and equalization time decreases by 23% for FLC compared with the mean-difference algorithm under new European driving cycle working conditions. The energy efficiency improves by 5.54% compared with the mean-difference algorithm. In addition, the two-stage bidirectional equalization circuit has good performance and improves the inconsistency.

The screenshot displays the Clarivate Analytics EndNote basic software interface. A blue arrow points to the 'Collect' menu item in the top navigation bar. Below the navigation bar, the 'Online Search' section is active, showing 'Step 1' with the instruction 'Select database or library catalog connection.' A dropdown menu is set to 'Select...' and a 'Connect' button is visible. At the bottom of the interface, there is a language selection bar with options: View in, 简体中文, 繁体中文, English, Deutsch, 日本語, 한국어, Português, and Español. A small console window at the bottom left shows the text 'javascript:void(0);'.

# Створити запис

The screenshot shows the EndNote basic interface. The top navigation bar includes 'EndNote™ basic', 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Downloads'. Below this, there are sub-menus: 'Online Search', 'New Reference', and 'Import References'. The 'New Reference' dialog box is open, showing 'Bibliographic Fields'. The 'Reference Type' dropdown is set to 'Generic'. The 'Author' field has a text prompt: 'Use format Last Name, First name. Enter each name on a new line.' The 'Quick Search' panel on the left shows a search bar and a list of references. The 'My References' section shows a list of groups and their counts.

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification.

Только для авторов!!!

**До 14.04.2017 (включительно) открыт прием материалов для публикации в четвертом номере польского научного журнала

**Abstract**  
The English and Chinese reading proficiency of 1376 Grade 4 students in 24 Hong Kong primary schools were assessed using measures developed for the Progress in International Reading Literacy Study. Students' parents provided information about home reading activities (HRA) aimed at supporting their children's reading prior to them entering school ("early home reading activities": EHRA) and during Grade 4 ("home reading activities"). Results indicated that EHRA was a stronger predictor of reading performance in both Chinese and English than HRA. Moreover, typical HRA such as reading books, telling stories and singing songs were found to be predictive of reading performance in both Chinese and English. In English, in addition, playing
