

Humboldt meets Leibniz

Connecting Talents Across Generations

Emerging Topics in Biomedical Engineering and Implant Research

Networking Event for Emerging Talents

Are you an up-and-coming researcher in the field of biomedical engineering and implant research? Do you want to expand your personal network, exchange ideas with recognised experts across disciplines and forge research contacts for the future?

22–24 September 2024
Hannover (Germany)

Deadline:
11 February 2024

Then apply for “Humboldt meets Leibniz”!

For the second time, this networking event brings together 150 doctoral and post-doctoral researchers with 12 renowned Alexander von Humboldt Foundation award winners to discuss current research projects and explore individual career paths.

Topics:

- › Biomedical research
- › Tissue engineering
- › Material science and metamaterials
- › Material simulation
- › Transplantation and vascular surgery
- › Medical and bioinformatics and machine learning
- › Microelectronics and sensor technology
- › Prosthetics

Details:

- › 22–24 September 2024
- › Hannover, Germany
- › Plenary and invited talks, oral and poster presentations
- › Sessions on career topics
- › Financial support for travel and accommodation costs
- › Deadline: 11 February 2024

Leibniz University Hannover invites you to join us at Schloss Herrenhausen, Hannover, and meet the leading experts in your field!
